

# The Wave

Computerized Pool & Spa Water Analysis

**Up to 1/10 the cost  
of reagent system**

## Fast

6 tests in  
30 seconds...

## Easy

Just dip a strip...

Then place into scanner...

## Effective Cost

6 tests for 15 cents...

The Wave Xpress III is the latest test strip scanner developed by Home Port Computer for fast, easy pool and spa water analysis. Combined with the *Pool Watch* software, a complete water analysis with diagnostic printout *takes two minutes and costs 15 cents!*

## FEATURES

### Tests Performed

**Tests Scanned:** total hardness, total chlorine/bromine, free chlorine, pH, total alkalinity, stabilizer, borate, biguanide, peroxide.

**Other tests/water conditions:** salt, iron, copper TDS, phosphate, nitrates, algae, cloudiness, staining

### Multiple Chemical Lines

The *Pool Watch* software is completely customized for the chemical products you sell. This means one testing system for all your chemicals, chlorine, bromine and biguanide alike. Customers are maintained in a full featured data base. Mailing labels and customer lists may be printed out along with a complete test history for each customer. Customer data bases from other water testing software may be transferable into the *Pool Watch* software (ask for details).

### Networkable

Multiple testing stations in one store location can share a common data base of customers.

The Wave scanner and software are provided by Home Port Computer. All tech support and training is handled directly with Home Port. (866) 275-0547 [www.h2o-testing.com](http://www.h2o-testing.com)

Test Name	10:20 Date: 6/22/09	Test Result	Units	Status	TEST REPORT DATE: 6/22/09
Total Chlorine	4.8	5.0	5.1		
Free Chlorine	1.9	2.0	2.1	**	Shock treatment required
pH	7.2	7.6	6.1		2.0e Total Alkalinity Exceeded
Total Alkalinity	100	110	10	**	Sanitizer Performance
Calcium Hardness	200	200	175	**	4.0e Total Phosphate Exceeded
Stabilizer	20	20	20		15.0e Total Chlorine Exceeded
Iron	0.0	0.0	0.0		20.0e Total Chlorine Exceeded
Copper	0.0	0.0	0.0	**	20.0e Total Chlorine Exceeded
Cloudiness	0.0	0.0	0.0		12.0e Total Chlorine Exceeded

Test Charge per test is \$ 0.00 Test rate by customer  
Based on test kit cost less bulk discounts

- \*\* Shock treatment is required to remedy chlorine deficiency. The chlorine level is corrected, the pH should be raised 0.2 for customer safety. Please do not swim swimming until the Free Chlorine is at least 2.0 ppm.
- Sanitizer Performance: Sanitizer level is low. Add more sanitizer to the pool. The sanitizer level is low. Add more sanitizer to the pool.
- Total Alkalinity: Total Alkalinity is low. Add more total alkalinity to the pool. The total alkalinity is low. Add more total alkalinity to the pool.
- Total Chlorine: Total Chlorine is low. Add more total chlorine to the pool. The total chlorine is low. Add more total chlorine to the pool.
- Total Phosphate: Total Phosphate is high. Add more phosphate to the pool. The total phosphate is high. Add more phosphate to the pool.
- Total Chlorine Exceeded: Total Chlorine is high. Add more total chlorine to the pool. The total chlorine is high. Add more total chlorine to the pool.
- Total Chlorine Exceeded: Total Chlorine is high. Add more total chlorine to the pool. The total chlorine is high. Add more total chlorine to the pool.
- Total Chlorine Exceeded: Total Chlorine is high. Add more total chlorine to the pool. The total chlorine is high. Add more total chlorine to the pool.
