

WINTER MIX

makes closing and opening your pool less stressful.

WINTER MIX

SIZE | 20 LB.

Swimming pools are typically closed longer than they are open. Winter Mix is ultra long lasting.

FEATURE & BENEFITS

- Proven technology keeps pool water clean and clear during off-season
- Prevents staining and scaling of surfaces*
- Great idea for mesh winter covers
- Easy spring start-up, saving time and money
- Dissolves quickly in water
- Controls staining and scale from metals in the water
- 1 pail of Winter Mix treats up to 15,000 gallons of water

CLOSING YOUR POOL

Perform these steps while the pool water is circulating.

STEP 1 Resolve any current water problems, such as algae or cloudy water, before closing the pool.

***STEP 2** Adjust water balance factors to their appropriate ranges:

pH	7.2 – 7.6
Total Alkalinity	100– 120 ppm
Calcium Hardness	200– 400 ppm
<i>(the colder the climate the higher the CH levels should be)</i>	

STEP 3 Shock the water using 2 pounds of **QUICK SHOCK** or **MULTI SHOCK EXTRA** per 10,000 gallons of water.

STEP 4 Add **WINTER MIX** to pool. See product label for application directions.

STEP 5 Use **FILTER MAGIC** to clean your filter prior to close. Filters become more difficult to clean the longer they are left untouched.

STEP 6 If applicable, lower the water level of your pool. Consult your local dealer.
